## 16. BASIS OF QUTATION:

(A)

The bidders shall quote rates separately for (a) loading, unloading and stacking at respective ends (b) for minimum charge per trip for loading, unloading and stacking .

The bidders shall quote the rates for the distance slab 1 to 30 KM. If the distance run by the vehicle exceeds 30 KM the rates quoted by the bidders will be reduced in different distance, slabs automatically on the principle of telescopic rates.

If the distance exceeds 30 KM but remains within 50 KM., the rate quoted by the bidders will automatically come down by 20% of the rates quoted for the distance slab 1 to 30 KM and transportation charge for the entire distance up to 50 KM will be calculated on the reduced rate.

Similarly the rate for 1-30 KM will come down by 40% beyond 50 KM but up to 100 KM, by 55% beyond 100 KM but up to 200 KM by 62.5% beyond 200 KM but up to 300 KM, by 65% beyond 300 KM but up to 400 KM and by 72.5% beyond 400 KM.

**The Company, however will allow protection of the charge of the previous distance slab if the transportation charge for any distance in the next slab is less then that of the previous distance slab.**

If the rate quoted is say ₹ 4.00 per tonne KM for the distance slab of 1 to 30 KM., the rate will be ₹3.20 per tonne KM for the distance up to 50 KM, ₹2.40 for the distance up to 100 KM, ₹1.80 for the distance up to 200 KM, ₹ 1.50 for the distance up to 300 KM, ₹1.40 for the distance up to 400 KM and ₹1.10 for the distance above 400 KM. The above is explained below with the help of illustrations.

### ILLUSTRATION:

(1) Let it be assumed that the distance run by the truck is 20 Kms weight of the material is 8 M/T and the tonne KM rate is ₹4.00 . The Transporter will get ₹.( 4 x 8 x 20) or ₹640.00 for transportation (excluding loading, unloading and counting). Loading unloading and stacking charge will be added with it, irrespective of the actual distance.

Illustration: (2) Let it be assumed that the tonne-KM rate is ₹4.00 for the distance slab 1 to 30 KM and a truck carries 8 M/T at a distance of 45 KM Here the rate for transportation (excluding loading, unloading, counting and stacking) will come down to 80% of ₹4.00 i.e. ₹3.20 per tonne-KM. So the transportation charge will be ₹3.20 x 8 x 45) or ₹1152.00. Loading, unloading and stacking charges will be added with it, irrespective of the actual distance.

Illustration: (3) Let it be assumed that the Unit-KM rate for one unit of material is Rs.16.00 for the distance slab 1 to 30 KM and the distance run by the truck is 100 KM. The transportation rate will come down to 60% if ₹16.00 i.e. to ₹9.60 per unit per KM. The transportation charge (excluding loading, unloading, stacking and counting) will be ₹960.00 for one unit of material and ₹1920.00 for 2 units of material. Loading, unloading and stacking charge will be added with it irrespective of actual distance.
